

Numeracy Bingo

Dec. 21-Jan. 5

As numeracy is a major focus for Cold Lake Elementary School, we're looking to provide students with a fun way to continue their learning during the winter break!

How to play:

Each student in Grades K to 4 will be provided a bingo card (see below).

Mark or cross off the activities that you complete on the bingo card. On the week of January 6 to 10, students can return their bingo card with their name and class written at the bottom to be entered to win prizes! Students will receive one draw entry per row completed on their bingo card – up to 5 chances to win!

When you go for a drive with your family, read the speed limit signs you drive past.	Help an adult write the grocery list for your family. Estimate how much the groceries will cost.	Use a newspaper to cut out numbers. Read the numbers to a parent.	Use your body to form the numbers 1 to 5.	Read a menu with an adult at a restaurant. Find the least and most expensive items on the menu.
Use pasta pieces to make a craft. Count how many pieces you used.	Help someone measure ingredients to bake or cook something.	Build an obstacle course in your house or yard. Discuss some of the shapes you used.	Print the numbers 1-10. Cut them out. Rearrange the numbers in order to count backwards and forwards.	Look for the number of grams of sugar in your 3 favourite cereals. Which one has the least amount of sugar? Which one has the most?
Go for a walk around the block. Estimate how much time the walk will take. Time your walk. Check to see how close you were when you get back.	Play a game. Ideas include war, adding or subtracting war, Uno, Skip-Bo, and Yahtzee. Talk about the strategies you use.	FREE	Help a parent clean out a junk drawer or the pantry. Talk about how you choose to organize and sort things (by colour, size, function, etc.).	Play with some Lego. Create patterns with the Lego blocks. You can use size, shape, or colour to create patterns.
When playing with some toys that you have, sort them in order from biggest to smallest.	With your favourite adult or older siblings, practice counting by 2's to 20, 5's to 50, 10's to 100.	Estimate how many steps it is from your bedroom to the living room. Check by trying it out and counting the number of steps it actually takes.	Pick your favourite story. As you read it, see how many times you can find numbers in the book.	Choose 2 objects from your cupboard that can hold water. Discuss which one would hold more. Try it out and see if you are correct.
Choose 3 pieces of furniture in your house. Guess how many hands wide each piece is. Measure with your hand and see how close you were.	Look up at the sky. Have a discussion with a friend, parent, or sibling about the shapes you see.	Guess how long it would take you to clean your room. Quick! Clean your room. Get your parents to time you and see how close you were.	Pick a date that is important to you. It could be a birthday or an upcoming holiday. Count how many days, weeks or months it will be until that special day arrives.	Draw a picture using the following shapes; squares, circles, rectangles and triangles. Count how many of each shape you used.
